FIRE PREVENTION WORKS

The fire prevention work required on land is dependent on the land use as defined in this Notice. Should you be unsure of the category your land is classified as, please contact your local Fire Control Officer.

The specific requirements for each of the defined land types referred to in this Notice is as follows:

RESIDENTIAL LAND

All flammable material/vegetation (except living shrubs and trees) MUST be maintained to a height that does not exceed 40 millimetres, and all piles of flammable material are to be removed from the land.

SMALL HOLDINGS (Rural Residential)

A firebreak (as defined) must be installed immediately inside and along all property boundaries, 2 metres in width and 4 metres in height.

The firebreak may only deviate from a boundary up to 6 metres to avoid established trees and/or other natural features that would make it impractical to be installed on the boundary.

A 20 metre Asset Protection Zone (as defined) **MUST** be slashed to a height that does not exceed 80 millimetres and be free of all flammable material, vegetation (dead trees and branches) surrounding dwellings, sheds and all haystacks.

All land on the Lot but outside the Asset Protection Zone (excluding the firebreak) that is not being actively grazed and or managed is to be maintained to a height not exceeding 100 millimetres.

Hardstands formed access ways and reticulated turf not exceeding a height of 40 millimetres and maintained in a green state may negate the need to install a firebreak in that area.

BURN PILES can be kept and are approved if they are no closer than 20 metres from any structure

FIREWOOD PILES can be kept but are to be stored away from a dwelling during the Restricted and Prohibited burning periods.

LARGE HOLDINGS

(Agriculture and General Farming)

NON-IRRIGATED LAND

A vehicle access track 4 metres in width which must include a 2-metre wide, and 4 metres high fire break (as defined) shall be installed immediately inside and along the lot boundary where it adjoins a road or railway reserve.

The firebreak may only deviate from the boundary, up to 6 metres to avoid established trees or other natural features that would make it impractical to install a firebreak at that location.

IRRIGATED LAND (as defined)

Firebreaks are NOT required on irrigated land that is being actively and regularly irrigated throughout the entire Restricted and Prohibited burning periods.

Irrigation channels that are situated inside and along a lot boundary will be accepted as a firebreak provided the irrigation channel is utilized on that property throughout the entire Restricted and Prohibited burning periods.

GENERAL NOTE

BURN PILES can be kept and are approved if they are no closer than 20 metres from any structure. **ALL FIREWOOD PILES** can be kept but are to be stored away from a dwelling during the Restricted and Prohibited burning periods.

IMPORTANT NOTE:

Where land is not actively grazed or maintained for the duration of the Restricted and Prohibited burning periods, a Fire Control Officer may require the landowner to undertake mitigation works to reduce the risk of bushfire. These works may include:

- the installation of a vehicle access track 4metres in width which includes a 2-metre wide and 4-metre-high firebreak as defined immediately inside and along all property boundaries; and/or
- The reduction of all flammable material including grass across the property to a height not exceeding 100 millimetres; and/or

- Isolated flammable material such as dead tree and tree branches **MUST** be removed.

BURN PILES can be kept and are approved if they are no closer than 20 metres from any structure.

PLANTATIONS

- Bare earth firebreaks of 15 metres in width and 4 metres in height must be maintained inside and along all boundaries of a plantation with 6-10-metre-wide internal firebreaks between compartments.

Where power lines pass through plantation areas, firebreaks must be in accordance with Western Power specifications.

This application shall include a plan detailing the alternative fire mitigation measures to be taken on the land. Prescribed Firebreak Variation/Exemption Forms are available from the Shire of Dardanup offices or by visiting the Shire of Dardanup website.
