Contamination management and education

What is changing in the next 6 months?

A SERVICE

all about theShire of Dardanup

INTRODUCTION

of a 3-bin FOGO system

CHANGE TO BIN DAY

for some in Eaton

Modern high-tech vehicles

Education and contamination management

1.

A strategic border remodel

A strategic border remodel

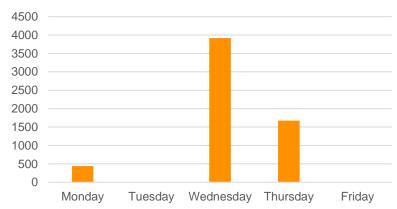

WHAT IT MEANS

- Better distribution of services across every weekday
- Change to bin day for some residents in Eaton

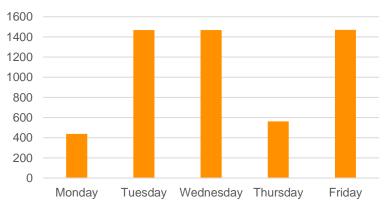

WHY?

- Caters for the growth in Eaton/Millbridge
- Shire is not reliant on sharing vehicles with neighbouring Councils
- Collection vehicles operating every weekday
- Getting ready for the move to FOGO

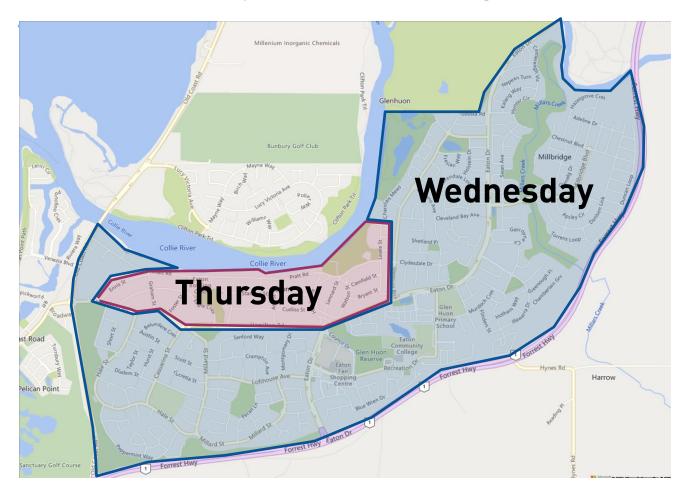

Current service numbers per day

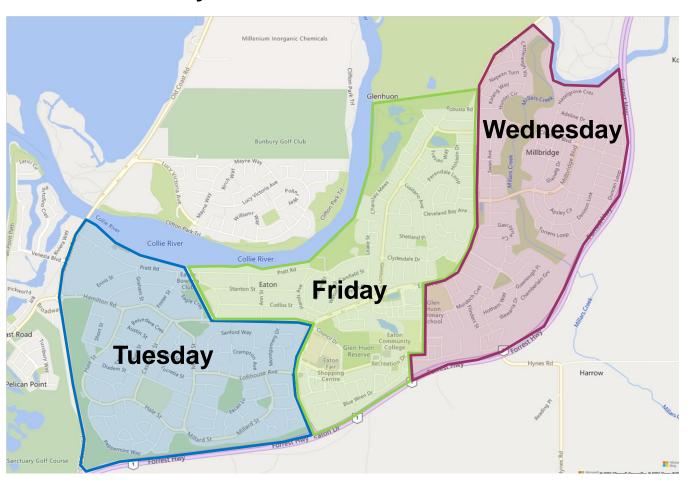

New service numbers per day

- Fortnightly recycling
- Fortnightly waste (on alternate week to recycling)

3.

Modern and smart vehicles

3 brand new vehicles are on their way

Property and service data on-board

Property specific information

8 on board cameras accessible in real time

Modern and smart vehicles

Live access to 8 on-board cameras

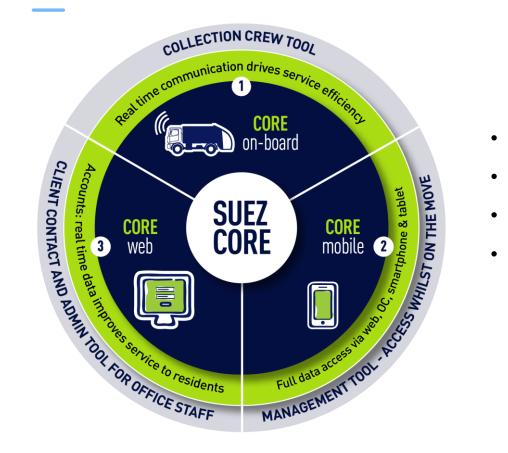

Real time GPS tracking

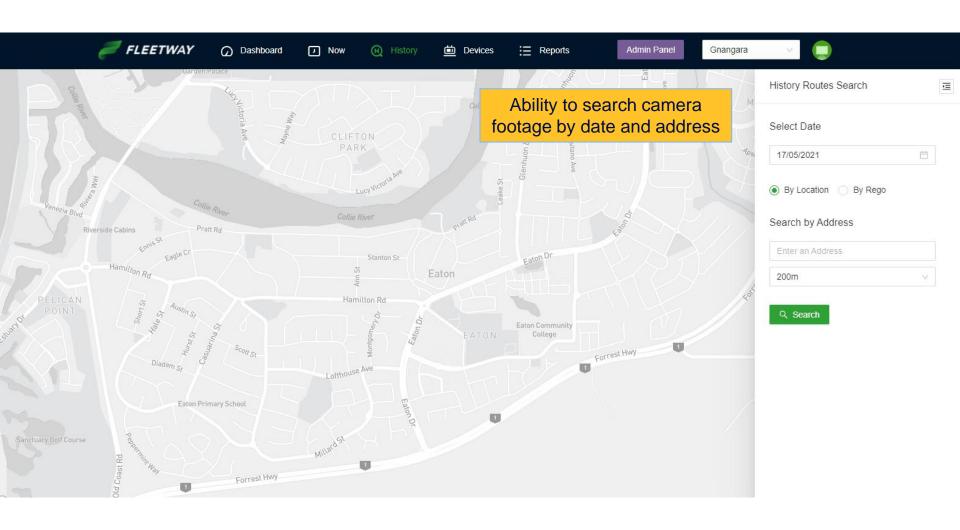

On board property & service information

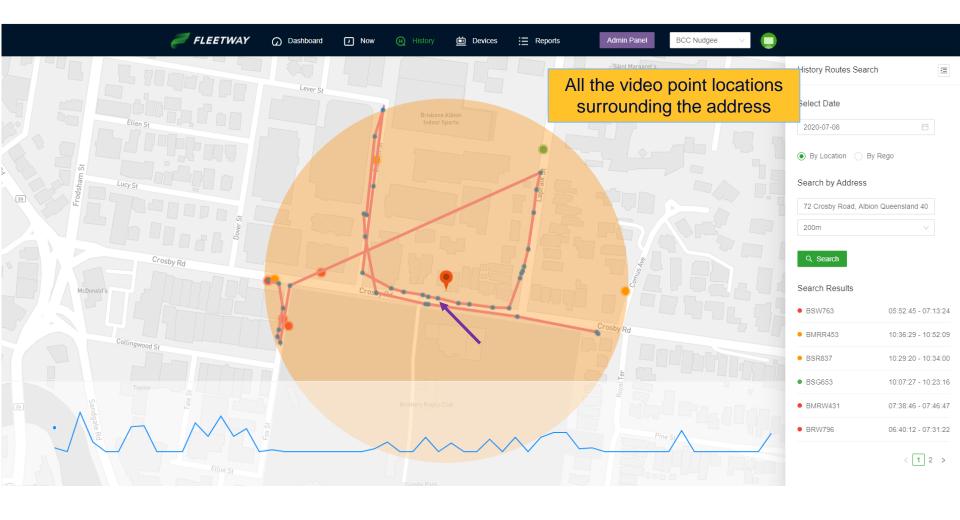

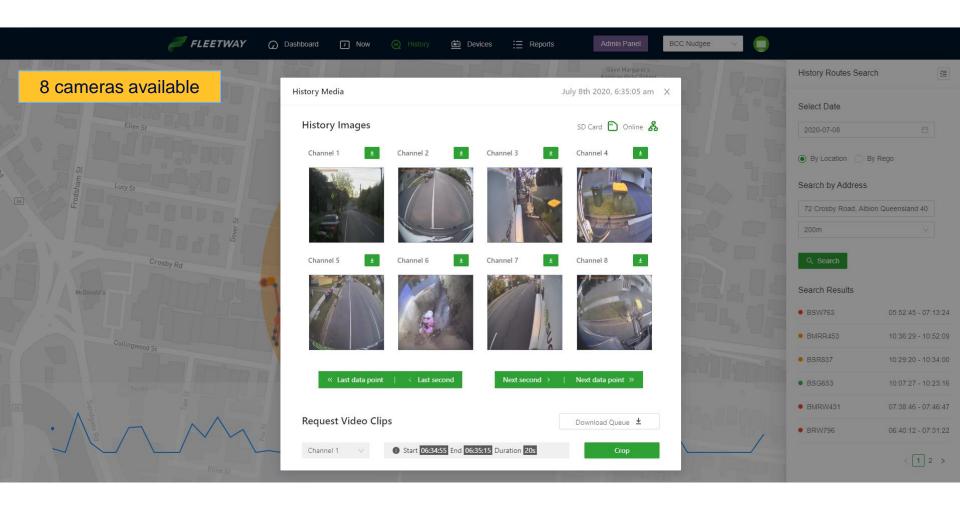

Service management framework

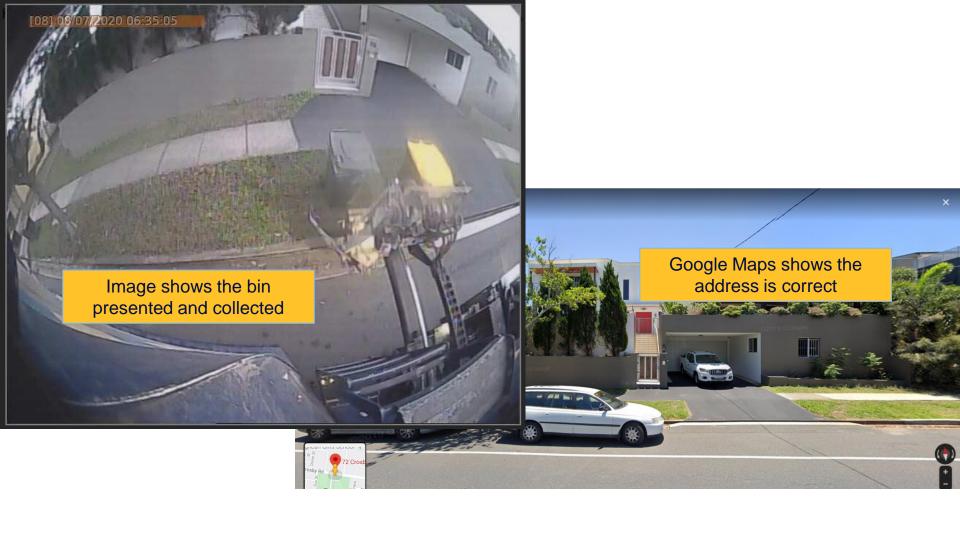

- Manages property and service data
- Monitor daily route progress
- Assign or reallocate tasks in real-time
- Deliver operational reporting

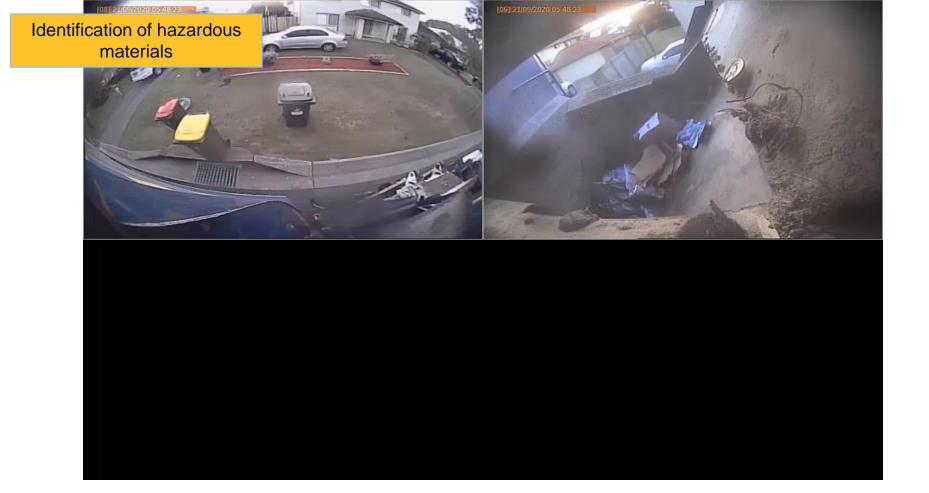

4

Education & community engagement

How we'll use our on-board technology

- 1. Auto generated letters to residents with contaminated bins
- 2. Provide the City with timely evidence and reports
- 3. Targeted education and positive reinforcement (down to specific streets)

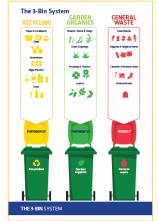

We will support ongoing education and engagement

5. Support for the Shire

How we'll support you through the change

- 1. Provide a property database for every property with current and new service days
- 2. Hardcopy and electronic maps
- 3. Access to SUEZ CORE: Property & Service management system (real-time information on bin maintenance requests, missed bin requests, truck locations and trails)
- 4. Access to live on-board cameras
- 5. Draw on our extensive experience

THANK YOU
