

# PUBLIC NOTICE

## TEMPORARY BOAT RAMP CLOSURE

The Eaton Foreshore Boat Ramp will be closed for renovations with site works scheduled to commence 27 July 2020. Universal Marina Systems have been awarded the Contract and it is expected that works will take approximately four weeks to complete.

The upgrade works to the boat ramp include the installation of scour protection at the toe of the ramp and improve the ramp surface.

The finger jetty to the west of the boat ramp will be extended by approximately five metres. This will enable the jetty to be used at low tides and multiple users can access the jetty on fuller tides.

The platform to the east will be upgraded to a floating structure to enable various sized boats to utilise the platform during variable tide conditions. This platform will be universally accessible.
